

Getting started with Altmetric Explorer for Publishers

Welcome to the Altmetric Explorer for Publishers!

Your access enables you to:

- Quickly uncover and access attention highlights and patterns
- Browse, filter, sort, and export altmetric attention across sixteen unique sources + citation.
- View attention surrounding your publications + search for other publishers and journals
- Explore the full Altmetric database of over 11.5 million research outputs with online attention
- Search for mentions from specific outlets or source.
- Set up email alerts and create publicly shareable reports

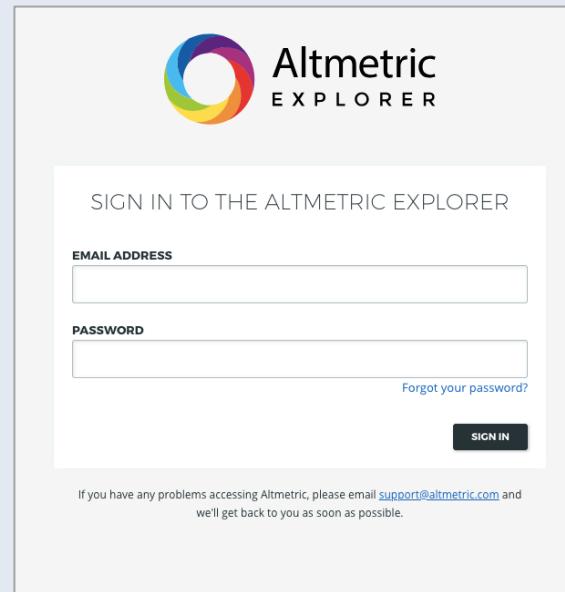

Logging in

Go to
<http://www.altmetricexplorer.com>.

Click 'create an account' in the top right.

Create a username with organizational email address.

Check your email to validate your account - click the link to confirm and access the platform.

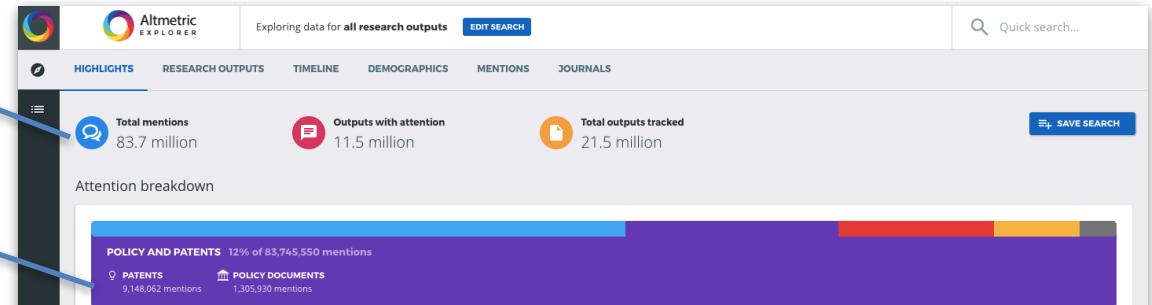

The image shows the sign-in page for the Altmetric Explorer platform. At the top is the Altmetric Explorer logo, which consists of a stylized circular icon made of overlapping colored segments (blue, green, yellow, red) followed by the text "Altmetric EXPLORER". Below the logo is a light gray rectangular form field. Inside the field, the text "SIGN IN TO THE ALTMETRIC EXPLORER" is centered above two input fields: one for "EMAIL ADDRESS" and one for "PASSWORD". To the right of the password input field is a blue link "Forgot your password?". At the bottom right of the form is a dark blue "SIGN IN" button. Below the form, a small note in gray text reads: "If you have any problems accessing Altmetric, please email support@altmetric.com and we'll get back to you as soon as possible."

Explorer Highlights at a Glance

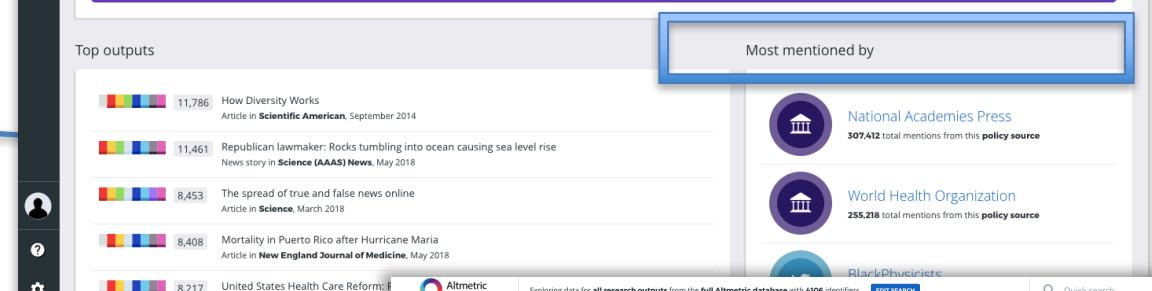

The new Explorer Highlights provides at-a-glance insights as soon as you log in.

See current total mentions and outputs across entire database or for any search set

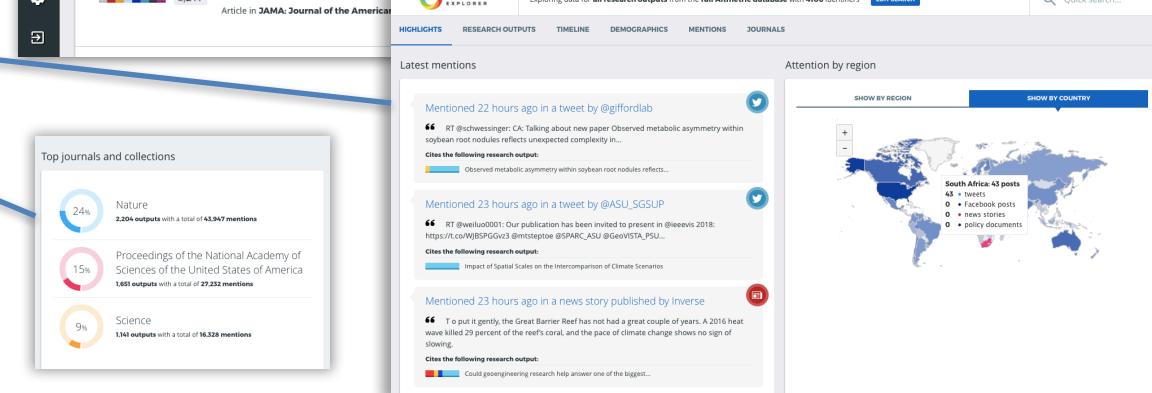

Quickly view totals and percentages by mention source type

Immediately see top-mentioned outputs and influencers sharing and discussing research the most

Other summary statistics and insights include most recent mentions, top journals/collections, geographic data, plus a distribution graph of Altmetric Attention across any search set or query.

Dive deeper via links at the bottom of each section.

Analyzing Research Outputs

Click tabs along top menu bar to analyze results further

Access saved search dashboard, alerts, and custom reporting

Sort by attention score, source type, publication date, citation count, or recent mentions

Help, account settings, sign out

Quick search for keywords, identifiers, publisher or journal names, and more.

Edit Search button opens Advanced Search window

Save searches to return to results, set up alerts, and build reports

Export results as a CSV

Need more help? Send an email to Support via the button on the bottom right

Click on any badge to go to the details page for that output

Editing queries via the advanced search

The screenshot shows the Altmetric Advanced search interface. It includes sections for Research outputs, Publishers, journals, and collections, Dates, and Publication date. Various search fields and filters are available, such as KEYWORDS, TITLE OF OUTPUT, TYPE OF OUTPUT (Articles selected), SCHOLARLY IDENTIFIERS, ORCID, PUBMED QUERY, and PUBLISHER NAME. A blue line highlights the 'Articles' option under 'TYPE OF OUTPUT'. Another blue line points from the 'PUBLISHER NAME' field to a callout box. A third blue line points from the 'PUBLICATION DATE' section to another callout box. A fourth blue line points from the 'RUN SEARCH' button to a final callout box.

RUN SEARCH

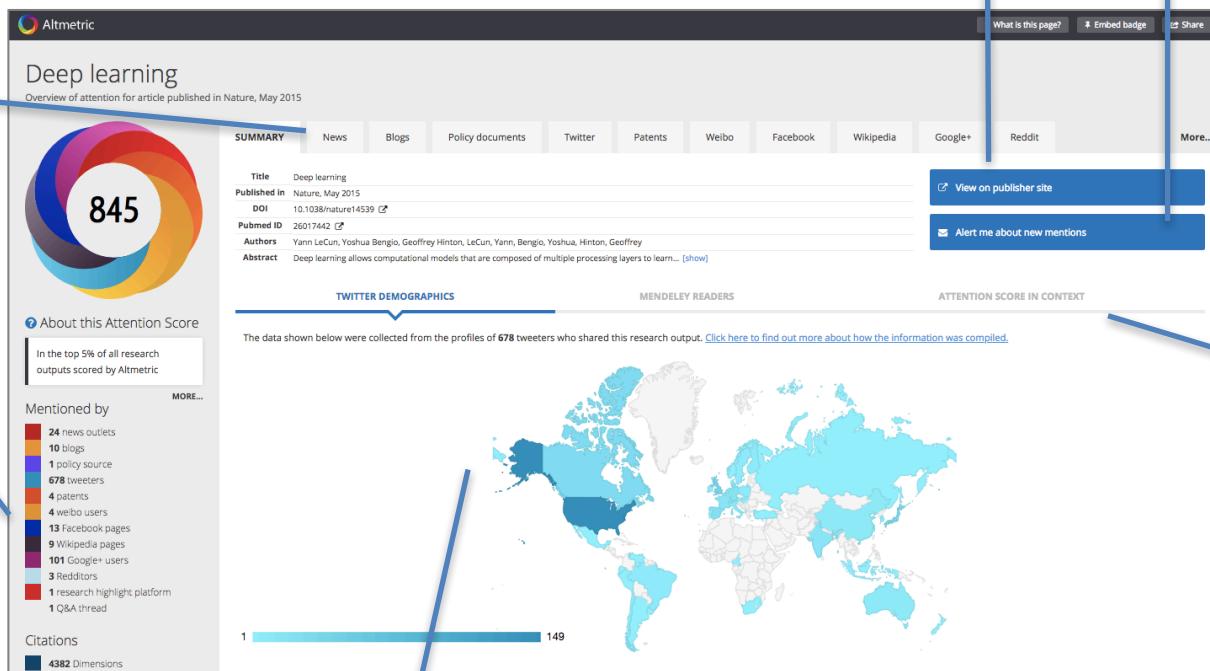

Limit your search by publication date range and/or those outputs with recent mentions

Search by publisher, journal or collection, DOI or handle prefix, including batch ISSN queries

Click Run Search once criteria and filters are selected

Altmetric Details pages

The details pages provide an auditable, public-facing record of each research output's attention, plus additional bibliographic and demographic information.

Click through different attention category tabs to audit each individual mention and citation

Color-coded, live-updating summary of all attention found for this research output

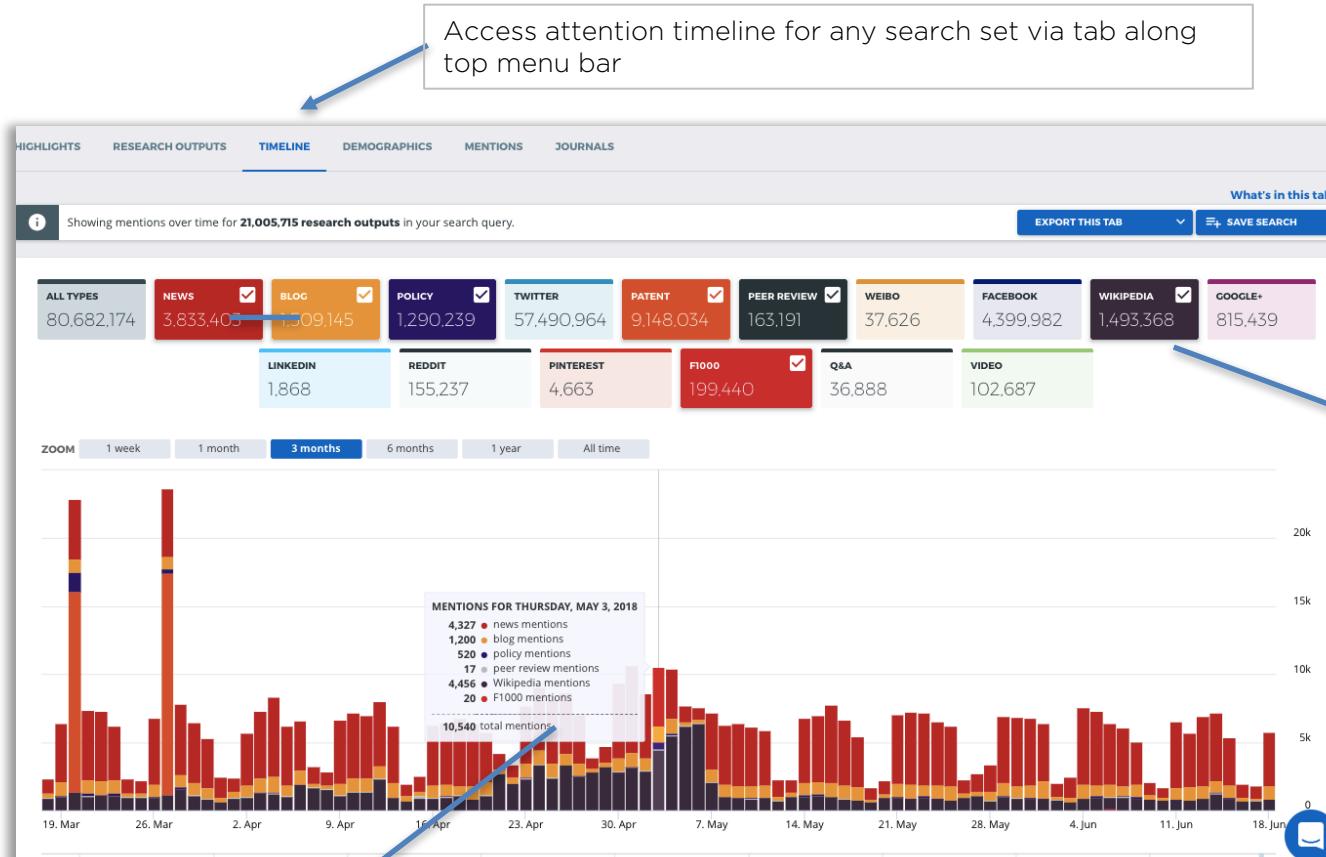

Distribution maps and demographic data for Twitter mentions and Mendeley counts

View publication on publisher site or source of first mention

Receive daily email updates summarizing output's new attention

Attention Score in Context tab ranks output's reach and attention compared to other publications, including those of similar age and from the same journal

Summary of attention over time

Select sources of attention of value to your stakeholders, benchmarking and analyzing attention patterns

Hover over spikes in graph to view attention breakdown. Click through to see results in Mentions tab

Use sliders along the bottom of the graph to change the time frame of the data displayed.

Demographics Info for any search

Identify and analyze geographic coverage across four distinct attention source types in the Demographics tab.

Interactive distribution maps for Twitter, Facebook, News, and Policy mentions available via tabs along above

The screenshot shows the Demographics tab selected in a navigation bar with options: HIGHLIGHTS, RESEARCH OUTPUTS, TIMELINE, DEMOGRAPHICS (selected), MENTIONS, and JOURNALS. Below the navigation are four tabs: TWITTER (Tweets and tweeters), FACEBOOK (Facebook posts and Pages), NEWS (News stories and outlets), and POLICY (Policy documents and sources). A message indicates there are 4,437 news stories from 798 unique news outlets in 56 countries. On the left is a world map where darker red shading represents higher news coverage. Nigeria is highlighted with a callout showing 6.01% total news stories and 4.05% unique news outlets. A legend at the bottom of the map shows scale markers for 1, 10, 100, 1k, and 10k. To the right is a table titled 'What's in this tab?' with columns for COUNTRY, TOTAL NEWS STORIES, and UNIQUE NEWS OUTLETS. The table lists the top 15 countries:

COUNTRY	TOTAL NEWS STORIES	UNIQUE NEWS OUTLETS
United States	2,878 (64.9%)	406 (50.9%)
United Kingdom	487 (11%)	125 (15.7%)
India	306 (6.9%)	28 (3.5%)
Australia	163 (3.7%)	26 (3.3%)
Japan	83 (1.9%)	2 (0.3%)
Germany	66 (1.5%)	23 (2.9%)
Canada	48 (1.1%)	14 (1.8%)
Singapore	42 (0.9%)	7 (0.9%)
China	37 (0.8%)	10 (1.3%)
Italy	33 (0.7%)	14 (1.8%)
Spain	31 (0.7%)	18 (2.3%)
France	28 (0.6%)	10 (1.3%)
SHOW MORE 44 other countries with news attention

Export data as csv

Breakdown of mentions via country and unique source - click through to mentions details via map or list

Dive into Altmetric mentions details

Uncover, filter, and analyze mentions across source-types, specific sources, countries, and mention date ranges for any search.

Drop down menu allows you to select one or more source type

The screenshot shows the Altmetric Explorer interface with the 'MENTIONS' tab selected. On the left, a dropdown menu is open, listing various source types such as News stories, Policy documents, and Sina Weibo posts. The main search area includes fields for 'Add source', 'Search for attention sources or a specific outlet/user', 'Show mentions between', 'Search for a country', and buttons for 'SHOW HIGHLIGHTS ONLY', 'APPLY', and 'RESET'. Below the search area, a summary states 'Showing 80,442,318 mentions (from 68,449,741 individual posts) of research outputs from the results of your search query.' A detailed mention card is displayed, showing a tweet by Alex Grey (@Alex_Grey_) from May 14, 2018, at 11:50 PM UTC, which has been reviewed in a publication.

Search by one or more specific source, by name,. Limit by mention date range or country

Click through to any mention source

Filter to view most recent, high-profile news mentions

Click blue Apply button to add selected filters and limiters to search; reset criteria with red button

Save searches or export mentions data as csv

Journal-level data at your fingertips

Analyze attention patterns at the journal or collection level across your publications or any search set.

Sort results by total mentions or mention-source type to reveal visibility tendencies across different journals

Save search and export results as csv

Click on journal name to view outputs with mentions for each title

The screenshot shows a user interface for analyzing journal-level data. At the top, there are tabs: HIGHLIGHTS, RESEARCH OUTPUTS, TIMELINE, DEMOGRAPHICS, MENTIONS, and JOURNALS. The JOURNALS tab is selected. A message box indicates 'Found 33,248 journals and collections in your search results.' Below this, a table lists journals with their names, total mentions, and counts for various mention sources. The table includes columns for TOTAL MENTIONS, NEWS MENTIONS, BLOG MENTIONS, POLICY MENTIONS, TWITTER MENTIONS, PATENT MENTIONS, PEER REVIEWS MENTIONS, SINA WEIBO MENTIONS, and FACEBOOK MENTIONS. The first few rows of the table are:

JOURNAL/COLLECTION	TOTAL MENTIONS	NEWS MENTIONS	BLOG MENTIONS	POLICY MENTIONS	TWITTER MENTIONS	PATENT MENTIONS	PEER REVIEWS MENTIONS	SINA WEIBO MENTIONS	FACEBOOK MENTIONS

Shareable, custom reports for pattern-monitoring and stakeholder engagement

Create a custom report for any saved search, with editable modules to highlight data of most value to your organization. Reports can be shared as a live-updating URL or a pdf.

The screenshot shows the Altmetric Explorer interface for creating a shareable report. On the left, a sidebar lists report modules: ADD TITLE, ADD OVERVIEW, ADD ATTENTION BREAKDOWN, ADD ATTENTION CHART, and ADD TOP OUTPUTS LIST. A callout box points to these modules with the text: "Click blue buttons on side toolbar to add more report modules". At the bottom of the sidebar, there is a checkbox labeled "Make public?" with the note: "This report will be publicly available after you have saved it." Below this is a blue "SAVE CHANGES" button and a red "CANCEL" button. A callout box points to the "SAVE CHANGES" button with the text: "Select Make Public to save as URL, then blue Save Changes button. Share button will reveal report URL".
The main area displays a report titled "Report for Taylor and Francis 2018". It includes a "REPORT OVERVIEW" section with four metrics:

- Total mentions: 234,180
- Research outputs: 28,884
- Outputs with mentions: 25,287
- Sources of attention: 13

A callout box points to the "Edit the title or delete any auto-populated modules" text.
Below the overview is an "ATTENTION SOURCE BREAKDOWN" section showing mentions from various sources:

Source	Mentions
News mentions	4,393
Blog mentions	1,265
Policy mentions	11
Twitter mentions	223,080
Patent mentions	215
Peer review mentions	
Facebook mentions	
Wikipedia mentions

The Altmetric Attention Score and badge are designed to quickly indicate the type and volume of attention an item has received.

The score increases the more unique attention an output receives; it may go down if the original mention is deleted, a mention is flagged as spam and removed, or when we add new attention sources and re-weight our scoring algorithm.

Volume
The Attention Score for an article rises as more people mention it.
We only count 1 mention from each person, per source.

Sources
Each mention source contributes a different base amount to the final Score, based on the relative reach of the source. For example, a news story in <i>The New York Times</i> contributes more to the Score than a tweet.

Authors
How often the author of a mention talks about research, who their audience is, and whether they mention particular journals or publishers often. For example, organic interest in an article from a doctor counts more than a journal tweeting the same link.

The score is a quantitative measure of the attention a scholarly output has received.

Try it out!

1. Identify the top three sources of mention for any search set via the Highlight tab.
2. Find the attention for a set of outputs
 - Search by name, author, or journal, or upload a list of identifiers via the Advanced Search
 - Try sorting your results by most policy, news, or patent mentions
 - Export your results as a csv for further analysis
3. Locate mentions from specific sources
 - Visit the 'mentions' tab to filter the mentions by a source that's of value to your stakeholders (eg, New York Times, key influencer on Twitter, LSE Book Reviews)
4. Analyze who is engaging with your research
 - Export all of the mentions as a csv and create a pivot table or other sorting tool to see organize all your mentions sources
5. Save your search and set up an email alert to receive regular notifications on the latest activity
 - Click 'save search' and navigate to the saved search dashboard on the left menu panel, selecting a daily, weekly, or monthly report – remember to login to your account first!
6. Create a custom report to share
 - In the saved search dashboard click document icon to open up the custom report builder pop-out and edit each field to meet your needs. Save and share as live-updating URL or pdf
